

Project Scope Mapping

Project Title

Cozy Docs

Brief Summary of Project

Graphics-focused website/React application that focuses on note-taking, task management, and document creation and editing.

Project Objectives

- Learn a JavaScript framework by creating a React application
- Exploring creating an application
- Add content to my portfolio

Key Deliverables and Due Dates

The project, the application, is due in week 12 on the 18th of October, 2024.

Milestones and Completion Dates

Visual style (colours, mood, art style, etc.), wireframes and page layout, coding, creating or finding graphics.

Scope Exclusions

- Researching
- Learning the React framework and other modules or libraries being used
- Creating or finding the graphics

Constraints

- Time and deadline
- Intermediate knowledge of React

Timeline

Week 7

- Iron out project details
- Project features
 - Research what libraries and modules might be needed
- Mood board and visual inspiration
- Decide on a visual graphics style

Week 8

- Create wireframes
- Create a low/medium fidelity prototype
 - Colours
 - Pages
 - Features

Week 9

- Start creating the application
 - File structure, break up pages and components
 - Create a GitHub repository
- Code the application

Week 10

- Continue coding the application from last week
- Create or find the graphical assets needed
- Create a database for the application

Week 11

- Continue from last week, coding and creating/finding assets
- Finish up the project

Week 12

- Clean up any code
- Build the project so that it is an app
- Submit documentation and project

Budget (if applicable)
